

mRNA-1273

\$\$\$

Moderna

⌘ Encapsulated mRNA Vaccine

mRNA encoding for the Spike protein is protected in a lipid nanoparticles (like soap bubbles). Once absorbed, the cell expresses the Spike protein resulting in an immune response.

⊕ **Efficacy** : Phase III **94.1%** (US/UK strain)
 --% (B1.351 "SA" strain)

📄 **Dosing** : 0.5mL - 2 doses - 28 days apart

📄 **Storage** : **-20°C - 6 months**
+2-8°C - 30 days

BNT162b2

\$\$

BioNTech/Pfizer 

⤵ Encapsulated mRNA Vaccine

mRNA encoding for the Spike protein is protected in a lipid nanoparticles (like soap bubbles). Once absorbed, the cell expresses the Spike protein resulting in an immune response.

⊕ **Efficacy :**  **95%** (US/UK strain)
 **--%** (B1.351 "SA" strain)

📄 **Dosing :** 0.3mL - 2 doses - 21 days apart

📄 **Storage :** **-70°C - 6 months**
+2-8°C - 5 days

ChAdOx1 / AZD1222 (Covidshield) \$

Oxford/Astrazeneca 

Viral Vector Vaccine

dsDNA encoding for the Spike protein is protected in a safe virus. The infected cell expresses the Spike protein which leads to an immune response.

⊕ **Efficacy** :  **82%** (US/UK strain)
 **10%** (B1.351 "SA" strain)

 **Dosing** : 2 doses - 12 days apart

 **Storage** : +2-8°C

JNJ-78436735 / Ad26.COV2.S

Johnson & Johnson

Viral Vector Vaccine

dsDNA encoding for the Spike protein is protected in a safe virus. The infected cell expresses the Spike protein which leads to an immune response.

🎯 **Efficacy :** Phase III **72%** (US/UK strain)
Phase III **57%** (B1.351 "SA" strain)

📄 **Dosing :** 1 dose

📅 **Storage :** +2-8°C for 3 months
-20°C for 2 years

BBIBP-CorV

\$\$\$

Sinopharm

Inactivated Virus Vaccine

SARS-CoV2 is chemically inactivated (with a chemical called beta-propiolactone•) so it cannot replicate but all the proteins remain intact.

🎯 **Efficacy** : Phase III **79%** (US/UK strain)
 --% (B1.351 “SA” strain)

📅 **Dosing** : 2 doses - 3 weeks apart

📦 **Storage** : +2-8°C

NVX-CoV2373

Novavax

Virus-like Particle Vaccine

Nanoparticles are coated with synthetic spike proteins. An additional element called adjuvant is added which allows to boost the immune reaction.

⊕ Efficacy :  **89%** (US/UK strain)
 **49%** (B1.351 "SA" strain)

📅 Dosing : 2 doses - 21 days apart

📅 Storage : +2-8°C for 3 months
-20°C for 2 years

Sputnik V / Gam-Covid-Vac

Gamaleya (Sputnik V)

Viral Vector Vaccine

dsDNA encoding for the Spike protein is protected in a safe virus. The infected cell expresses the Spike protein which leads to an immune response.

📌 **Efficacy** :  **91%** (US/UK strain)
 **--%** (B1.351 "SA" strain)

📌 **Dosing** : 0.5mL - 2 doses - 28 days apart

📌 **Storage** : +2-8°C for 3 months
-20°C for 2 years

CoronaVac SinoVac

\$\$\$

Inactivated Virus Vaccine

SARS-CoV2 is chemically inactivated (with a chemical called beta-propiolactone•) so it cannot replicate but all the proteins remain intact.

⊕ **Efficacy** : Phase III **50%** (US/UK strain)
 --% (B1.351 “SA” strain)

 **Dosing** : 2 doses - 3 weeks apart

 **Storage** : +2-8°C
